

Measuring Time with Scents

Humera Madani

Note: This Prototype is an autobiography

Understanding the Prototype

- The relationship between scent and time
- Personal and customized according to each user
- No fixed scale
- Basenotes

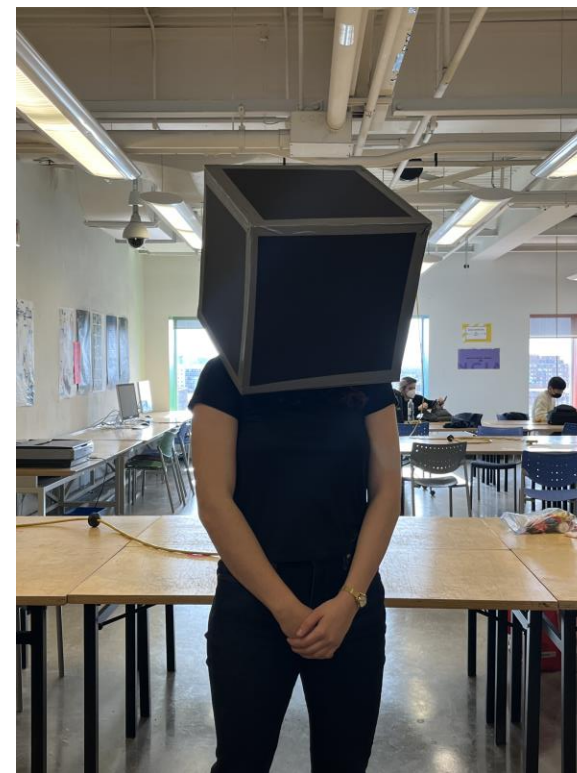

The Process

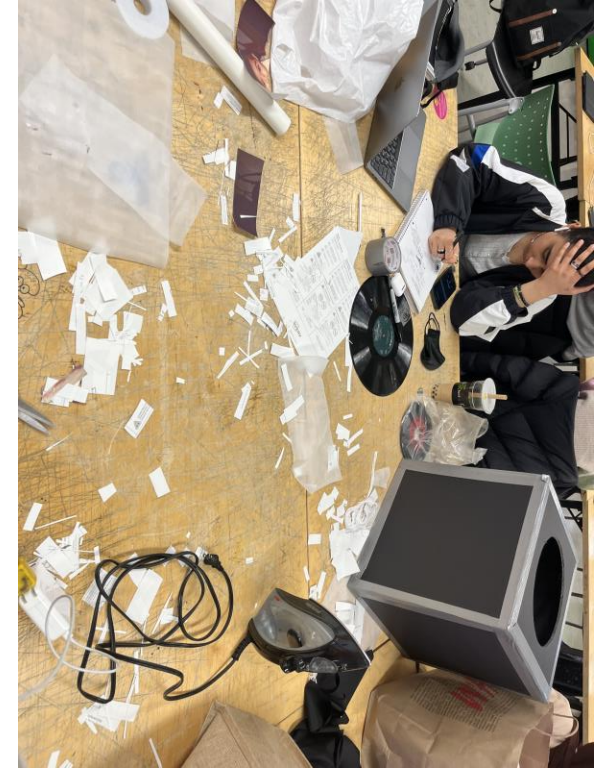

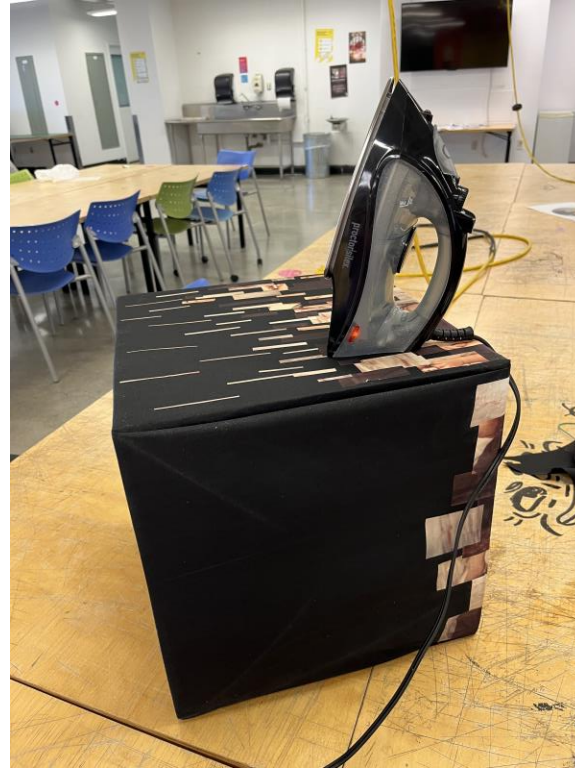

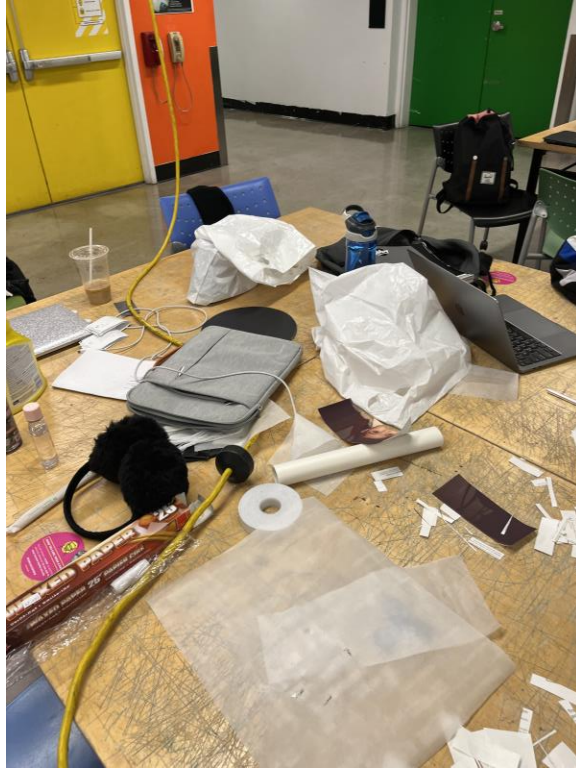

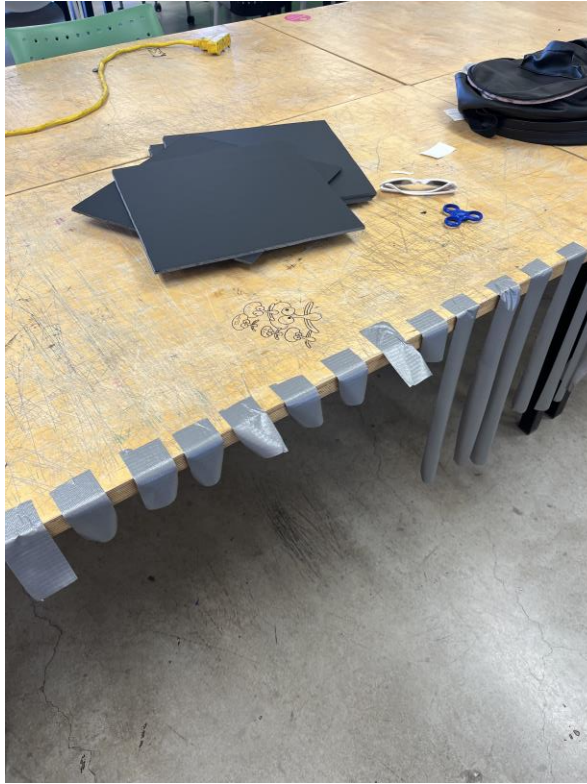

- Listing down moments in my life that I can sharply recall with a scent.
- Hunting down the scents.
- Creating boxes that act as headpieces to enable a deep connection to the scent only.
- Customize each box's exterior with a 'dispersed' image from that period.
- Create a Guidebook to understand the meaning behind each box.
- Display 'samples' of the scents, to have an additional option.

A look inside my process

to more scents creating memories...
